OF

MUSKINGUM COLLEGE

NEW CONCORD, OHIO.

FOR THE COLLEGIATE YEAR ENDING JUNE 20,

1901.

CALENDAR.

FOR THE COLLEGE YEAR 1900-1901.

1900

September 18, Tuesday, 2 P. M. ..... Fall Term Opened
December 20, Thursday, at noon ..... Fall Term Closed

1901

January 2, Wednesday, 2 P. M. ..... Winter Term Opened
March 21, Thursday, at noon ..... Winter Term Closed
April 2, Tuesday, 2 P. M. ..... Spring Term Opened
May 16, Thursday ..... Senior Examinations
June 19, Wednesday, 8 A. M. ..... Trustees Meet
June 20, Thursday ..... Commencement
July 8, Monday, 2 P. M. ..... Summer Term Opens
August 16, Friday, at noon ..... Summer Term Closes

FOR THE COLLEGE YEAR 1901-1902.

1901

September 17, Tuesday, 2 P. M. ..... Fall Term Opens
December 19, Thursday, at noon ..... Fall Term Closes

1902

January 7, Tuesday, 2 P. M. ..... Winter Term Opens
March 27, Thursday, at noon ..... Winter Term Closes
April 1, Tuesday, 2 P. M. ..... Spring Term Opens
May 23, Friday ..... Senior Examinations
June 5, Thursday, 7:30 P. M. .....
Recital by Graduating Class of Music Department
June 18, Wednesday, 8 A. M. ..... Trustees Meet
June 19, Thursday ..... Commencement

COMMENCEMENT, 1901.

JUNE 16, SABBATH, 7:15 P. M.

Baccalaureate Sermon, by the President.

JUNE 17, MONDAY, 7:30 P. M.

Address to the Christian Associations, by Prof. David MacDill, D. D., LL. D., Xenia, Ohio.

JUNE 18, TUESDAY.

9:00 A. M. Field Day Exercises on Athletic Field.

7:00 P. M. I. Presentation of Diplomas by Literary Societies:

1. Aretean—Presentation by Flora B. Wallace.
   Response by Janet O. Kerr.
2. Philomathean—Presentation by J. Fulton Wilson.
   Response by J. Walter Liggitt.
3. Union Literary—Presentation by Andrew A. Thompson.
   Response by Will G. Kennedy.

II. Address to the Societies.

JUNE 19, WEDNESDAY.

8:00 A. M. Meeting of Board of Trustees.

2:00 P. M. Meeting of Alumni Association.

7:00 P. M. Address to the Alumni by Otho P. Norris, class of 1881, Cashier People's National Bank, Barnesville, O.

8:00 P. M. Contests for the Prizes in Oratory offered by Mr. J. M. Brown, Wheeling, W. Va.

JUNE 20, THURSDAY.

9:30 A. M. Commencement.

7:30 P. M. Annual Concert.

p12028

BOARD OF TRUSTEES.

TERM EXPIRES 1901.

John L. Dickey, M. D.....Wheeling, W. Va.
R. B. Maxwell.....Mansfield, Ohio
James Archer.....Steubenville, Ohio
Silas B. Yost.....Thornville, Ohio
A. C. Jamison.....New Concord, Ohio
Rev. J. A. Kennedy.....New Concord, Ohio
Rev. William Duncan.....New Concord, Ohio

TERM EXPIRES 1902.

Rev. W. H. Vincent, D. D..740 Grand River Ave., Detroit, Mich.
Rev. J. S. McMunn.....North Salem, Ohio
Prof. John A. Wilson, D. D.....Pittsburg, Pa.
Rev. D. K. McKnight, D. D.....Mechanicstown, Ohio
Rev. J. T. Caldwell.....Iberia, Ohio
W. S. Heade, Esq.....1105 Wheeling Ave., Cambridge, Ohio
J. M. Brown.....104 S. Front St., Wheeling, W. Va.

TERM EXPIRES 1903.

Rev. David Livingston....Station A, Route 2, Columbus, Ohio
Rev. J. T. Campbell.....Kimbolton, Ohio
Rev. J. W. Martin, D. D.....Millersburg, Ohio
R. L. Brownlee.....Steubenville, Ohio
Benjamin Marshall.....New Concord, Ohio
J. M. Blackford, M. D.....Martins Ferry, Ohio
Rev. F. D. Findley.....30 Douglass Ave., Mansfield, Ohio

OFFICERS OF THE BOARD OF TRUSTEES.

Rev. J. W. Martin, D. D., Millersburg, Ohio.....President
Rev. William Duncan, New Concord, Ohio.....Secretary
L. J. Graham, New Concord, Ohio.....Treasurer

EXECUTIVE COMMITTEE.

Jesse Johnson, Chairman.
J. M. Brown,
Rev. J. S. McMunn,
Rev. J. A. Kennedy,
Benjamin Marshall.

FINANCE COMMITTEE.

Jesse Johnson, Chairman.
Benjamin Marshall,
A. C. Jamison.

VISITING COMMITTEE.

Rev. D. K. McKnight, D. D.
J. M. Brown,
James Archer,
Rev. J. T. Caldwell,
W. S. Heade, Esq.

COMMITTEE ON SPECIAL DEPARTMENTS.

Jesse Johnson,
Rev. J. T. Campbell,
Rev. David Livingston.

FACULTY AND INSTRUCTORS.

REV. JESSE JOHNSON, D. D.,
President and Professor of Greek.

REV. J. A. GRAY, A. M., PH. D.,
Professor of Mathematics and Logic.

T. H. PADEN, A. M.,
Professor of Latin and Political Science.

L. J. GRAHAM, A. M.,
Professor of English Language and Literature.

C. J. MARSHALL, A. B.,
Professor of Natural Sciences.
Absent during 1900-01, Studying in Harvard University.

IONE STONE,
Instructor in Latin and German.

W. E. WELLS, A. M.,
Instructor in Natural Sciences.

HOWARD McDONALD,
Tutor in Greek.

J. H. HARDING,
Instructor in Common Branches.

MRS. EVA HUMMER HULL,
Teacher of Piano, Organ and Violin.

ANNA ALLISON JONES,
Teacher of Voice.

MAUD HOLLINGSWORTH BETHEL, B. S.,
Teacher of Elocution; Physical Director for Ladies.

SARA ALISON GRAY, B. S.,
Instructor in Art.

ICA CAMPBELL,
Teacher of Commercial Branches.

E. A. PETERSON,
Physical Director for Gentlemen.

T. H. PADEN, Secretary.

JESSE JOHNSON, Librarian.

LENA WILSON, Librarian in Charge.

GENERAL INFORMATION.

HISTORY AND AIM.

In 1836 the first steps were taken by the people of New Concord to establish a Christian institution of learning. In 1837 Muskingum College was chartered under the laws of the state of Ohio. In 1877 the formal control of the College was transferred to the United Presbyterian Presbyteries of Muskingum and Mansfield. In 1883 the United Presbyterian Synod of Ohio took formal control of the institution. These transfers have largely increased her constituency and made her the representative of higher education for a Christian body having a large membership in Eastern and Northern Ohio, Michigan, and West Virginia. But, though Muskingum is under denominational care and control, she offers her advantages to all on absolutely equal terms.

Her aim is to give thorough training. The college idea should be culture—the production of the best manhood and womanhood. And this does not require that utility be lost sight of, but only that it be held in proper relation. The discipline of the studies which are called "practical" is more useful than their direct contribution to skill in the callings of life. Muskingum, therefore, strives to be *a good college, not a poor university.* She concentrates all her effort, so far as studies are concerned, on the preparation of young men and women to receive the bachelor's degree, and her good reputation for undergraduate work has proved her wisdom.

THE TOWN.

New Concord, Ohio, is on the main line of the B. & O. Railroad, sixty-five miles west of Wheeling. Connections at Pittsburg, Wheeling, Bellaire, Cambridge, Zanesville, Newark, Mt. Vernon, Mansfield, Columbus, Cincinnati and many other points make New Concord very easy of access.

The town supports six churches and has no saloon.

The healthfulness of the place, the moral and religious character of its people and its freedom from temptation make it a most desirable place for the student.

BUILDINGS.

Muskingum now has three good buildings, two of them new, the other remodeled so thoroughly as to be practically new. All these buildings are heated by steam and lighted with the brilliant acetylene gas light. A system of water works has been arranged so as to furnish water for toilet and bath rooms. In short the buildings are modern buildings, well equipped for all college purposes.

Old College has now six large recitation rooms, besides three rooms used for laboratory purposes.

New College is a building of pressed brick three stories high including basement. The length is one hundred and twenty-four feet, the depth sixty feet. The basement floor will accommodate, besides storage rooms, five recitation rooms of ample size and well lighted by windows six feet high, all above ground.

The main floor contains a chapel room which, by opening two recitation rooms in the rear, will seat 500 people. The main floor contains also music rooms, the president's office, two large recitation rooms and a library 43 by 34 feet. There are three cloak rooms on this floor.

The second floor contains a recitation room and three halls for the literary societies. To each of these rooms a cloak room is attached.

Alumni Gymnasium, a cut of which appears on another page, is a substantial brick structure, completed during the current year. It contains an exercise room of ample size, the physical director's office, the dressing and locker room, and the bath room. The building is heated by steam, lighted by acetylene gas and well ventilated. The apparatus bought is of the best quality, and of such selection as to minister best to the physical needs of the students.

Few colleges are better equipped than Muskingum for conserving and developing physical health and strength.

ATHLETIC FIELD.

A good athletic field, well graded and drained, affords students an opportunity for out door exercise and sports.

DEPARTMENTS.

Beside the College proper and the Preparatory School, there are the Music, Elocution, Art and Commercial Departments.

In the College proper three courses of study are offered: the Classical, leading to the degree of B. A., the Scientific, leading to the degree of B. S., and the Literary, leading to the degree of B. L. There is also a Teachers' Course, about which information is given elsewhere. These courses of study are outlined and described elsewhere in this catalogue.

The work of the Preparatory School is so planned as to prepare the student for entering the collegiate courses. Many students could enter the collegiate courses to much better advantage by taking at least the last year of their

preparatory work here rather than elsewhere. Information concerning the work in the Music, Elocution, Art and Commercial Departments will be found in another place.

CO-EDUCATION.

Young ladies are admitted to all departments of the College on the same terms as young men. It is believed that the association of young men and women contributes to the best culture and development of both.

ADMISSION.

1. If the applicant is not known to some member of the Faculty he should bring certificates of good character.

2. (1) An applicant from another college of good standing will be given, without examination, the rank in this College to which the work he has done entitles him. He should bring a certificate of honorable dismissal, stating to what class he belonged, together with a copy of the course he was pursuing.

(2) Applicants from high schools and academies whose work the Faculty may accept, will be given credit without examination for the exact amount of work they have done. They should bring certificates showing the studies pursued, the time given to each, the text-books used, the exact amount of ground covered in each, and the grades earned. Blanks will be furnished to those desiring them.

(3) Applicants who are not included under (1) and (2) but who hold teachers' certificates, are requested to bring them. These will be used to determine the extent and nature of the examinations required.

(4) All others will have their standing determined by examination.

(5) Credits and deficits will be balanced in determining entrance rank.

GOVERNMENT AND DISCIPLINE.

The aim is to govern as little as possible, yet as much as is needed. The students are taught, encouraged and assisted in self-government. Discipline looks always toward the strengthening of the student's self-respect and sense of personal responsibility. The cases where this method fails are rare.

Whenever a student is known to be unfit to remain in the College he will be dismissed.

EXAMINATIONS AND PROMOTIONS.

When the student enters, his rank, with his deficits and credits, is entered on the records. From this time on an accurate entry is made of his work each term, the grade both in recitation and examination being recorded. Grading is on the scale of 100. A grade of less than 70 in recitation will not entitle the student to examination with his class, and the study must be taken again. If the student earns less than 65 in examination, he will be required to review privately and take another examination, or take the study again, at the discretion of the professor in charge.

Examinations of classes are held at the close of each term. No student who omits attendance upon examination in any branch at the appointed time will receive a grade in the study or be regarded as having completed it until the examination is passed. In any such case the student must present his reason for absence, unless he has obtained previous permission to postpone his examination. If the reasons are satisfactory, written permission will be given to have a special examination. This permission, together with the receipt of the Treasurer for the fee of one dollar, must be presented to the Professor, and the examination will be

given. Where absence at the time of the class examination was caused by sickness, no fee will be charged.

The Senior examination takes place four weeks before commencement, and will cover the studies of the Senior year.

A report of the class-work and examination in each study is sent to the parent or guardian at the close of each term.

Students will be advanced from any class to the next higher, if they have no uncompleted studies back of the former, and not more than three uncompleted studies in it. This rule applies to all promotions except that from Junior to Senior. For this there must be no uncompleted studies back of the Junior year, and not more than two in it.

Students who are not entirely regular in their work should carefully note the above, and also the fact that *in promotions, credits will not be balanced against deficits.* Every effort will be made to give students opportunity to make up back work, when it is back for no fault of theirs.

NUMBER OF STUDIES.

The number of studies in all ordinary cases is four each term, each having five forty-minute recitations a week. Credit will not be given for more than four in any term without previous permission, except where the courses of study call for more. The student is strongly advised to put any time which he may have above that which is necessary to meet the requirements of the class-room on supplementary reading and thorough preparation for his duties in his Literary Society.

LITERARY SOCIETIES.

Excellent opportunity for literary improvement and parliamentary training is afforded by the Societies of the College. There are three—the *Aretean*, sustained by the young women, and the *Union Literary* and the *Philomathean*, sustained by the young men. These Societies do excellent work, a work justly regarded on all hands as of great importance. Every student is required to join one of them. Habitual neglect of the Literary Society work would be regarded just as neglect of any other required work.

RELIGIOUS SOCIETIES.

A Missionary Society assists in supporting a missionary, a graduate of the College, in a foreign field. It holds meetings for prayer and for conference relative to its work. Contributions are entirely voluntary. The Young Men's Christian Association and the Young Women's Christian Association hold meetings every week for conference and prayer. Frequently they meet together for devotional purposes. The religious influence of the College is such that very few of the students remain outside of church membership.

LIBRARY.

The room provided in the New College building is well lighted and ventilated, and about three times as large as the room formerly used. New furniture has been added, and more will be supplied as may be necessary.

All the libraries about the College are now collected in the College Library. By purchase, donation and bequest the number has been increased to 3500 bound volumes, besides a large number of magazines and pamphlets.

The students make diligent use of the library. The room and reading matter are under careful regulations, which are cheerfully observed. There is provision for a regular increase in the number of books, selection being carefully made to meet the needs of the students.

The Library room is used also as a reading room. The best periodicals and papers are kept constantly on the tables, and every effort is made to furnish the student information on current events.

The room is open to students every week-day, free.

APPARATUS.

There is provision for a steady increase of facilities for work in the sciences. The patrons of the college may be assured that every effort will be made to bring these facilities up to the requirements of modern teaching in science. The purchases lately made have had special reference to the work in Physics.

Of the Chemical apparatus it may be correctly said that its amount and variety are sufficient to illustrate all the Chemistry required in ordinary Classical courses, and to give all the original Laboratory work required in such courses.

The pupils in Botany have the use of microscopes for plant analysis.

Mention may be made also of a set of Surveying instruments, of specimens useful in the study of Geology, and of various maps and charts for the use of students in Physical Geography, Physiology, Geology, History and other studies.

EXPENSES.

The charges made by the College are: (1) Tuition; (2) Graduation fee.

Tuition in Literary Department for Fall Term.....					$15 00
"	"	"	"	" Winter Term.....	13 00
"	"	"	"	" Spring Term.....	13 00

The rules of the Board require that no student shall be enrolled until his tuition for the term is paid.

No student will be received ordinarily for less than half a session, nor will any student ever be excused, for any reason whatever, from paying one-half the tuition of any session in which he has entered College.

When absence is caused by protracted illness, or anything else purely providential, a proper reduction will be made, unless the student retains his standing in class. In such case no reduction will be made for any reason. Tuition and terms of admission in other departments will be found elsewhere.

Graduation Fee—$5.00, payable once to the Treasurer with the tuition of the Spring term, Senior year.

Laboratory Charge—Each student in Chemistry pays at the beginning of the Fall term a fee of $2.50 to cover breakage and cost of chemicals used. An account is kept and the balance refunded at the close of the Winter Term.

Literary Society Fees—An entrance fee of $1.00, paid once for all on entering the Society, and a term fee of 50 cents, paid each term.

Students should furnish themselves with towels for use in their rooms and at baths in the gymnasium.

ESTIMATE OF NECESSARY EXPENSES FOR A YEAR.

Tuition	$41 00
Rent, for furnished rooms	19 00
Cooking	19 00
Provisions	$38 00 to 50 00
Fuel and Light	6 00
Books, for the year	$5 00 to 10 00
Total	$128 00 to $145 00

Without doubt many students spend $200 a year without feeling that they are extravagant. Yet it is a fact *that the total expenditure of some for a year of thirty-eight weeks has been less than* $150, *this including even railroad expenses to and from College.* In estimating the cost of a College education it should be remembered that it costs something to live at home. Students sometimes report that their incidental personal expenses are smaller here than at their homes.

THE MASTER'S DEGREE.

There was formerly a rule of this institution that the Master's Degree in course be conferred on graduates of the College of three years' standing who belonged to one of the learned professions or were engaged in teaching. At its annual meeting on June 23, 1897, the Board of Trustees took the following action:

1. "Hereafter the Master's Degree shall not be conferred in course, but on personal application. The Faculty shall adopt rules for their own direction in determining the fitness of the applicant to receive the degree. A diploma shall be given to the person on whom the degree is conferred, for which a uniform fee of ten dollars shall be charged.

2. "In no case shall any higher degree be conferred on one who has not taken the Bachelor's Degree at some reputable college."

SYNOPSIS OF

COLLEGIATE COURSES OF STUDY.

CLASSICAL COURSE.

To enter this course the student must have a knowledge of all the studies of the Preparatory Course. Greek will not be credited in any course except the Classical.

FRESHMAN YEAR.

FALL TERM.

Mathematics — Plane Geometry; Original Problems.
Latin — Virgil, Æneid, two Books; Grammar.
Greek — Anabasis, Books II and III; Grammar.
Physical Science — Physics: General Properties of Matter, Dynamics, Heat and Sound.

WINTER TERM.

Mathematics — Solid Geometry; Original Problems.
Latin — Virgil, Æneid, two Books; Eclogues; Prosody.
Greek — Lysias, selected orations; Grammar.
Physical Science — Physics: Light, Electricity, Magnetism; Selected Problems.

SPRING TERM.

Mathematics — Trigonometry: Plane; Right Spherical.
Latin — Cicero de Senectute or de Amicitia.
Greek — Plato's Apology and Crito.
Political Science — Origin of Government; U. S. Constitution.

Bible Study one hour a week throughout the year.

SOPHOMORE YEAR.

FALL TERM.

Mathematics—Mechanics; Elementary Principles in Reference to Solid Bodies.
Latin—Horace, Odes.
Greek—Homer's Iliad, Books I–III; Prosody; Mythology.
English—Study of Words.

WINTER TERM.

Mathematics—General Geometry: Conics; Higher Plane Curves.
Latin—Horace, Odes and Satires; Illustrative Readings from Latin Literature.
Greek—Euripides, Medea.
Literature—British: Historical and Critical Study.

SPRING TERM.

Mathematics—Oblique Spherical Triangle; Surveying; Navigation.
Greek—Demosthenes de Corona; The Attic Courts.
Natural Science—Botany; Plant Analysis.
Literature—American: Leading Periods and Principal Authors; Essays and Discussions.

Bible Study one hour a week throughout the year.

JUNIOR YEAR.

NOTE—First year German may be chosen throughout this year in place of Calculus, Greek New Testament (second term) and Required Readings. It must, however, be chosen at the opening of the year and for the full year.

FALL TERM.

Greek — Readings in the Gospels and Acts; New Testament Grammar.
Physical Science — Chemistry: Non-Metallic Elements.
Political Economy — General Principles.
{ *Mathematics* — Calculus: Differential and Integral;
or *German* — Beginning Lessons.

WINTER TERM.

Political Economy — Application of Principles.
Physical Science — Chemistry: Metallic Elements; Carbon Compounds.
English — Philosophy of Rhetoric.
{ *Greek* — New Testament: Selected Epistles;
or *German* — Lessons continued.

SPRING TERM.

Bible — Sacred History.
Natural Science — Geology.
Philosophy — Logic, Deductive and Inductive.
Literature — Shakespeare.
{ *Required Readings* — Assigned Subjects; Examinations;
or *German* — Readings and Grammar.

Bible Study one hour a week throughout the year.

SENIOR YEAR.

NOTE—The German of this year is second year German. First year German can not be substituted in this year.

FALL TERM.

Philosophy—Psychology: The Intellect.
Philosophy—Theoretical Ethics.
Philosophy—Evidences: Grounds of Christian Belief.
History—Linguistic Science;
or *German*—Selections from Literature.

WINTER TERM.

Philosophy—Psychology: Feelings and Will.
Astronomy—General.
Political Science—Advanced Work.
History—Outlines of Ancient and Modern Philosophy;
or *German*—Selections from Literature.

SPRING TERM.

Philosophy—Natural Theology: Grounds of Theistic Belief.
Astronomy—Mathematical.
Literature—British and American Authors; Critical Study of Masterpieces.
Political Science—Advanced Work;
or *German*—Selections from Literature.

Bible Study one hour a week throughout the year.

SCIENTIFIC COURSE.

To enter this course the student must have a knowledge of the studies of the first two years of the Preparatory Course.

FRESHMAN YEAR.

FALL TERM.

Mathematics—Higher Algebra, Wentworth, chapters 10–19.
Latin (4)—Nepos' Lives; Grammar.
English (1).
Physical Science—Meteorology.
History—English.

WINTER TERM.

Mathematics—Higher Algebra, Wentworth, chapters 20–27.
Latin (4)—Cæsar, two Books; Grammar.
English (1).
Natural Science—Zoology.
History—Ancient.

SPRING TERM.

Mathematics—Higher Algebra, Wentworth completed.
Latin (4)—Cicero, three Orations; Grammar.
English (1).
Political Science—Origin of Government; U. S. Constitution.
History—Modern.

Bible Study one hour a week throughout the year.

NOTE.—Figures in parenthesis indicate the number of hours a week.

SOPHOMORE YEAR.

FALL TERM.

Mathematics—Plane Geometry; Original Problems.
Latin—Virgil, Æneid, two Books; Grammar.
English—Study of Words.
Physical Science—Physics: General Properties of Matter; Dynamics, Heat, Sound.

WINTER TERM.

Mathematics—Solid Geometry; Original Problems.
Latin—Virgil, Æneid, two Books; Eclogues; Prosody.
Literature—British: Historical and Critical Study.
Physical Science—Physics: Light, Electricity, Magnetism; Selected Problems.

SPRING TERM.

Mathematics—Trigonometry; Plane; Right Spherical.
Natural Science—Geology.
Literature—American: Leading Periods and Principal Authors; Essays and Discussions.
Natural Science—Botany; Plant Analysis.

Bible Study one hour a week throughout the year.

JUNIOR YEAR.

NOTE.—First year German may be chosen throughout this year in the place of Latin. It must, however, be chosen at the opening of the year, and for the full year.

FALL TERM.

Mathematics—Mechanics: Elementary Principles in Reference to Solid Bodies.

Physical Science—Chemistry: Non-Metallic Elements.

Political Economy—General Principles.

{ *Latin*—Horace, Odes;
or *German*—Beginning Lessons.

WINTER TERM.

Mathematics—General Geometry: Conics: Higher Plane Curves.

Physical Science—Chemistry: Metallic Elements; Carbon Compounds.

English—Philosophy of Rhetoric.

{ *Latin*—Horace, Odes and Satires; Illustrative Readings from Latin Literature; or *German*—Lessons continued.

SPRING TERM.

Mathematics—Oblique Spherical Triangle; Surveying; Navigation.

Philosophy—Logic: Deductive and Inductive.

Bible—Sacred History.

{ *Latin*—Cicero de Senectute;
or *German*—Readings and Grammar.

Bible Study one hour a week throughout the year.

SENIOR YEAR.

NOTE.—The German of this year is second year German. First year German cannot be substituted in this year.

FALL TERM.

Philosophy—Psychology: The Intellect.
Philosophy—Theoretical Ethics.
Philosophy—Evidences: Grounds of Christian Belief.
History—Linguistic Science;
or *German*—Selections from Literature.

WINTER TERM.

Philosophy—Psychology: Feelings and Will.
Astronomy—General.
Political Science—Advanced Work.
History—Outlines of Ancient and Modern Philosophy;
or *German*—Selections from Literature.

SPRING TERM.

Philosophy—Natural Theology: Grounds of Theistic Belief.
Astronomy—Mathematical.
Literature—British and American Authors; Critical Study of Masterpieces.
Political Science—Advanced Work;
or *German*—Selections from Literature.

Bible Study one hour a week throughout the year.

A CORNER OF THE GYMNASIUM.

VIEW IN THE LIBRARY.

LITERARY COURSE.

Studies in Music and Elocution are made part of the regular Junior and Senior work in this course. It is believed that this may properly be done in view of the disciplinary value of these studies. Careful attention is asked at this point to the following explanations:

1. Students in Music and Elocution must make progress satisfactory to the professors in charge just as in any other studies.

2. Students can enter the Junior required work in Music and Elocution at any stage of their progress in these studies.

3. The work done in Music will be credited on the regular musical courses leading to the degree of Teacher of Music.

4. Those who begin the Junior Music having already made progress such that during the Junior and Senior years they complete the requirements for the degree of Teacher of Music, will receive that degree, besides that of B. L., at the time of their graduation from the Literary Course. Others will receive the degree of Teacher of Music after sufficient work to complete the requirements.

5. Music or Elocution taken previously or elsewhere cannot be substituted for the work in this course.

6. Music or Elocution can not be substituted for studies in other courses.

7. Tuition for the instruction in Music and Elocution will be charged extra, at the regular rates in those departments.

8. Pupils in Music and Elocution will be subject to the special regulations in those departments.

SYNOPSIS OF COURSE.

ENTRANCE REQUIREMENTS.

A knowledge of the studies in the first two years of the Preparatory Course.

FRESHMAN YEAR.

Same as in the Scientific Course.

SOPHOMORE YEAR.

Same as in the Scientific Course.

JUNIOR YEAR.

FALL TERM.

Physical Science—Chemistry: Non-Metallic Elements.
Political Economy—General Principles.
German—Beginning Lessons.
Music—Two private lessons a week in Piano, Organ or Violin. Or, an equivalent amount of work may be taken in private Voice and private Elocution.

WINTER TERM.

Physical Science—Chemistry: Metallic Elements; Carbon Compounds.
English—Philosophy of Rhetoric.
German—Lessons continued.
Music—Same explanation as in Fall Term applies here.

SPRING TERM.

Philosophy—Logic: Deductive and Inductive.
Bible—Sacred History.
German—Readings and Grammar.
Music—Same explanation as in Fall Term applies here.

Bible Study one hour a week throughout the year.

SENIOR YEAR.

FALL TERM.

Philosophy—Psychology: The Intellect.
Philosophy—Evidences: Grounds of Christian Belief.
German—Selections from Literature.
Music—Either No. 1 or No. 2.

1. One private lesson a week in Piano, Organ, or Violin, and three class lessons a week in Musical History and Theory.

2. An equivalent in work in private Voice and private Elocution.

WINTER TERM.

Astronomy—General.
Political Science—Advanced Work.
German—Selections from Literature.
Music—Either No. 1 or No. 2.

1. One private lesson a week in Piano, Organ, or Violin, and three class lessons a week in Harmony.

2. An equivalent in work in private Voice and private Elocution.

SPRING TERM.

Philosophy—Natural Theology: Grounds of Theistic Belief.
Literature—British and American Authors: Critical Study of Masterpieces.
German—Selections from Literature.
Music—Either No. 1 or No. 2.

1. Two private lessons a week in Piano, Organ, or Violin.

2. An equivalent in work in private Voice and private Elocution.

Bible Study one hour a week throughout the year.

WORK OF THE DEPARTMENTS.

PSYCHOLOGY.

The Senior class recites in this branch five times a week during the Fall and Winter terms. Since self-knowledge is necessary to moral self-culture, to the highest appreciation of the best literature, and to an accurate knowledge of men and the ability to help them, the constant aim is to acquire the ability to know self.

ETHICS.

The aim here is to ascertain the elements of the moral nature, the nature of virtue, and from these a correct theory of human duty. The wreck of the moral nature, as testified to by consciousness, is distinctly recognized, and the various schemes of reconstruction are examined and compared to find the true one. The theory of duty thus established is then applied to the discovery of duty in all the human relations.

EVIDENCES OF CHRISTIANITY.

The phenomena of the Bible itself constitute the main ground of the argument. The historical and scientific accuracy of the Bible at a time when such accuracy was not found elsewhere, the unity of purpose that binds the books into the Book, and above all, the character and life of the Christ and his influence in the world, are emphasized as proofs of the divine origin of the Scriptures and the Christian system. The old and tried arguments are studied as thoroughly as time will permit.

HISTORY OF PHILOSOPHY.

Special attention is given to those systems which have had the greatest formative influence on modern thought. Theses on appointed topics are required from the class.

LOGIC.

Schuyler's Logic is used as a text-book. Five recitations a week during twelve weeks are devoted to the study. In the field of deductive reasoning the usual method is pursued, special attention being given to the examination of formal arguments with a view to facility in detection of fallacies and in reduction of valid arguments. Original specimens of valid arguments and fallacies are brought for illustration. The philosophy of induction is presented and this important method of reasoning clearly explained.

NATURAL THEOLOGY.

The text-book used is Valentine's "Rational Theism." Besides the more usual methods of proof, the ontological and moral arguments are presented as thoroughly as the time allotted to the study will permit.

BIBLE.

The Juniors recite Bible History five times a week during the Spring Term. Book studies by the class are introduced freely into this work. Besides this, Bible study is required one hour each week of all students in the college classes.

GREEK.

Xenophon's Anabasis, the orations of Lysias and Plato's Apology are read in the Freshman year. During this year grammar is made prominent.

During the rest of the course not so much work in grammar is done in direct connection with the reading; but the grammar is studied separately by way of review. More freedom in translation is encouraged.

The Iliad gives an opportunity for the study of Grecian Mythology. The Greek stage is studied in connection with the reading of Greek tragedy.

In connection with the Oration on the Crown there is opportunity for the study of Athenian oratory and Athenian court procedure.

Two terms are now given to the study of the Greek New Testament. Much care is given to acquiring a good vocabulary. Some of the most prominent words are given special attention. The reading is about equally divided between gospels and epistles. Sight-reading is emphasized here.

Prose composition will receive due attention.

ENGLISH LANGUAGE AND LITERATURE.

To the student, ability to use his own language with accuracy, elegance, and force, is of first importance; it is also essential to a liberal education that he possess a clear and somewhat comprehensive knowledge of the literature of his language.

The College seeks a more systematic and thorough culture by giving increased attention to this department.

The English language in its etymological, syntactical, and rhetorical forms, as well as in its idiomatic construction, receives special attention.

A thorough course in the Philosophy of Rhetoric is required of all Juniors. The Life and Growth of Language is required of all Classical and Scientific Seniors who do not elect the German.

English Literature is studied by authors. Literary masterpieces are examined as to their value and as to the special moral and social forces by which they have been inspired and developed.

In close connection with this work the lives of the authors are studied. Essays upon various important topics are assigned from different epochs and read in the class-room.

A full term's study of Shakespeare is required of the Classical Juniors.

It is the aim of the work in American Literature to show what it is, how it has been developed, and how important it is to us as a people.

A brief history of the English Bible and a critical study of one book will constitute a part of next year's work.

PHYSICAL SCIENCES.

CHEMISTRY. No branch of science has undergone such radical changes in the mode of teaching in recent years as the science of Chemistry. Formerly it was deemed sufficient to teach the principles of the science and to rely on the principles of text-books or instructors as to the properties and reactions of various elements and compounds. But now, at the very beginning of the study, the student performs for himself experiments illustrating the difference between physical and chemical changes. This work, carefully performed, brings forcibly to the mind such clear and concise distinctions as can be obtained in no other way. The acid-forming elements are first taken up for study, because they are better adapted to the illustration of the general principles of the science than the base-forming elements. With the acid-forming elements, the general prin-

ciples, or working theories, are studied, *e. g.*, laws of chemical combination; atomic theory; valency; theory of acids, bases and salts; molecular weights; and chemical equations. Much time is spent with a discussion of formulas and of the equations representing the chemical reactions which take place. By the end of the first term the student is expected to have mastered the nomenclature and to be able to construct equations representing reactions taking place in each experiment, except where equations are not permissible. Problems are given with reference to molecular weights and in making corrections for temperature and pressure of gases.

The second term's work consists of a study of the base forming elements, together with one hundred or more experiments. A small portion of time is allotted to the study of the Carbon Compounds as an introduction to Organic Chemistry. With the apparatus and facilities now provided, Muskingum is better able to offer satisfactory work in this line than ever in her history.

In Physics, the important principles and laws will be illustrated by experiment.

Selected problems will be given to illustrate the mathematical part of the laws of this science.

In the study of

NATURAL SCIENCES,

Botany, Geology, etc., it has been found that the powers of observation have been sadly neglected. In these branches the idea will be not so much to master the words of any text-book as to find out from one's own observation that the author's statements are true. The aim in these studies, apart from the direct knowledge imparted, will be to train the mind to habits of minute observation, and to enable the pupil to do research work for himself.

MATHEMATICS.

This department is not conducted exclusively for the benefit of the few who may feel themselves gifted in the direction of mathematical celerity.

While wonderful calculating power is a gift not incompatible with true logical vigor, and therefore a gift not to be despised, it is not necessary to a thorough mastery of mathematical principles. The so-called mathematical prodigy is rarely a first-rate mathematician. He certainly is not deserving the name of mathematician, in the best sense of the term, if his remarkable gifts induce him to dispense with the *rationale* of principles while merely producing numerical results. While the best practical methods are presented, the student is always expected to furnish the *rationale.*

The training in Geometry is thorough, and is made interesting and practical by requiring a large amount of original work from the student.

Trigonometry, Plane and Spherical, is taught according to an original method, which enables the student, with the least tax upon the memory, to make himself able to dispense with the text-book while solving problems requiring the use of separate tables. He thus consults his tables free from all encumbrance. The same plan largely extends through the subjects of Surveying and Navigation.

General Geometry is the stepping stone to the Calculus.

Original methods are freely introduced in explaining and demonstrating the principles of the Differential and Integral Calculus.

The aim throughout the course is to teach the student to reason for himself.

ASTRONOMY.

The object in view in teaching this branch is to make it educational.

The study of astronomy is of the highest value as an intellectual training.

"No other science," says Professor Young, "so operates to give us, on the one hand, just views of our real insignificance in the universe of space and time, or to teach us, on the other hand, the dignity of the human intellect as the offspring, and measurably the counterpart of the Divine; able in a sense to comprehend the universe, and know its plan and meaning."

To attain to a reasonable measure of this knowledge and to understand in a reasonable degree the evidence by which some of the most interesting as well as astounding propositions are maintained, the physical features of the universe of worlds and its celestial mechanics are investigated, and some of the important mathematical principles are very carefully demonstrated.

During the second term, the principles necessary to a full comprehension of that indispensable problem—the equation of time—are taught.

During this term, also, the student is made acquainted with a complete method of calculating solar eclipses, the more difficult as well as the more interesting of the eclipse problems.

LATIN.

Early in the course the aim is to get a vocabulary, and to master the principles of word relations and of sentence relations. The aim is to learn to read. Roman History and Latin Composition are studied. Later in the course more attention is given to the content, and less to the form of the language. In the poets, while the versification is

studied, special attention is given to the literary and rhetorical features of the writers. The students are practiced in sight-reading. Roman Literature is studied in outline, with readings, reports and essays.

POLITICAL AND SOCIAL SCIENCE.

Four terms are given to these branches. The student will master the first principles of these sciences and study the application of these principles to the life of society.

Civics—During the last term of the Freshman year, Civil Government and the United States Constitution are taken up, using Willoughby as the basis of the work in the former, and Andrews in the latter. In the former, the origin and growth of our government, local, state and national, receive careful attention. In the latter, the Constitution itself is made the basis of close consecutive study.

Economics—Two terms of the Junior year are given to this subject. In the first term the leading principles of Political Economy are studied. In the second term attention is given to some of the many practical problems of Economic and Social Life—State Activity, Labor, Socialism, Money, Taxation, etc. The work of these terms consists of recitations, discussions, readings and reports.

Advanced Political Science—The Seniors pursue an advanced course in Political Science during the Winter and Spring terms.

GERMAN.

JUNIOR YEAR.

The Juniors Classical may, at the beginning of the year and for the whole year, elect German in place of Calculus in the Fall, Greek New Testament in the Winter, and Required Reading in the Spring. The Juniors Scientific may, in the same way, elect German in place of Latin throughout the Junior year. The Juniors Literary are required to take

German throughout the year. The German of this year is first-year German, and less than a full year's work in it cannot be given credit in winning any degree. The work of the year is intended to give a working knowledge of the language. Forms are mastered, a vocabulary is acquired, and the principles of syntax are familiarized by practice in translation, both of German into English and English into German. During the last term of the year the class will be able to enjoy some selections from Literature.

SENIOR YEAR.

The German of this year is to open to those only who have completed the work of the Junior year. It will consist throughout the year of appropriate selections from German writers, and will be conducted with a view to the appreciation and enjoyment of these writings as literature. In the Classical and Scientific Course the Senior German may be elected in place of Philology, History of Philosophy, and the second term of Advanced Political Science. In the Literary Course, Senior German is a required study throughout the year.

MUSIC AND ELOCUTION

IN THE LITERARY COURSE.

The reader is referred to the explanations which accompany the synopsis of the course, and also to those parts of this Catalogue which exhibit the work of the departments of Music and Elocution.

REQUIRED READINGS.

Besides the collateral reading which may be required in any of the studies, the Juniors Classical who do not elect German will be required to take, during the Spring Term, readings appointed by the Faculty, and be examined on them as on any other work. Tastes and aptitudes of students will be taken into consideration in the assignments.

COURSE OF STUDY FOR TEACHERS.

[See following page for outline.]

Sincerely desiring to be of service to that large number of young men and women who are looking toward teaching as a calling, and who do not yet feel themselves able to meet the expense of a complete college course, Muskingum College offers the following course of study, on the completion of which the student receives a certificate, testifying to the work done. No degree is granted for this course.

At any point in the course, we shall willingly furnish the student with a certificate indicating the work already done. This certificate will be put up in attractive form.

There will be, also, required readings and examinations in psychology, pedagogy, comparison of school systems, and educational biography.

A glance at this course will show that it contains all the subjects ordinarily taught in our public schools, graded and ungraded, including the ordinary high school.

Those who enter for this course have all the privileges enjoyed by other students, and are under the same requirements.

We are confident that it will be a great benefit to any teacher to thoroughly complete this course. The teacher, who has a true ambition and a high ideal will, however, desire to go on from this point and complete one of the other courses. Full credit will be given on the other courses for work done in this. After completing this course the student can complete either the Scientific or the Literary course in two years, or (by some extra work in Greek) the Classical course in three years.

COURSE OF STUDY FOR TEACHERS.

	First Year.	Second Year.	Third Year.	Fourth Year.
Fall Term.	Grammar, Arithmetic, Descriptive Geography.	Algebra begun, Advanced Grammar, Latin Lessons, Higher Arithmetic, Physical Geography.	Higher Algebra, 1st t'm, Nepos' Lives (4), English (1), Meteorology, History of England.	Plane Geometry, Virgil, Study of Words, Physics.
Winter Term.	Grammar, Arithmetic, Elementary Physiology.	Elementary Algebra, continued, Elementary Rhetoric, Latin Lessons, Physical Geography, Physiology, advanced.	Higher Algebra, 2d t'm, Cæsar (4), English (1), Zoology, Ancient History.	Solid Geometry, Virgil, English Literature, Physics.
Spring Term.	Grammar, Arithmetic, American History begun.	Elementary Algebra, completed, Roman History and Viri Romæ, Higher Arithmetic, American History, advanced.	Higher Algebra, completed, Cicero's Orations (4), English (1), Civics, Modern History.	Trigonometry, Geology, American Literature Botany.

See preceding page for explanations. Figures in parenthesis indicate the number of hours a week.

Bible Study one hour a week during the third and fourth years.

PREPARATORY SCHOOL.

STATEMENTS CONCERNING THE COURSE.

The whole of this Course is necessary for those who expect to enter the Classical Course; the first two years for those expecting to enter the Scientific or the Literary Course.

Students who for any reason have not a good elementary knowledge of the studies of the first year will be required to spend a year on them. Those who are found well prepared in English Grammar as it is presented in good elementary text-books, in Arithmetic as presented in Ray's Third part or White's School Arithmetic, and in Descriptive Geography, Elementary Physiology and the leading facts of American History, will be allowed to enter the second year.

SECOND YEAR.

Higher Arithmetic.—Students who have not previously completed Ray's Higher Arithmetic or a full equivalent will be required to do so before passing to the next year.

Physical Geography.—In this important study two terms are required.

American History.—Those who have completed well some one of the ordinary school works on this subject will be ready to take up the more advanced work required in the second year. The work will consist of a rapid review of leading facts, and then a more detailed study of important periods with the aid of text-book and library references.

English.—1. Grammar. Unless special proficiency can be shown, the student must take at least one term in some advanced work. If, at the end of one term, sufficient mastery has not been obtained, the right is reserved to require further work, even though the pupil may have made passing grades. 2. Rhetoric and Composition. Two terms are given to this work. It will consist of a study of the principles of good prose-writing, largely illustrated by selections. The work will be made practical by requiring from the student original compositions, which will be criticised by the instructor.

Physiology.—Those who have completed well some one of the more elementary text-books in this branch will be ready for the more advanced work required in the second year.

Algebra.—Real success in the higher mathematics depends very much upon a thorough mastery of the rudiments of Algebra. For this reason the student who has never studied Algebra will be required to study Wentworth's "First Steps in Algebra" for two terms, reviewing and re-reviewing as the instructor may direct. During the third term the pupil studies the first nine chapters of Wentworth's Higher Algebra. This year's work is so planned that the student who does it well will find himself well prepared for the severer Algebraic study of the third year.

Latin.—Students must be prepared in the elements of English Grammar. For two terms Bennett's Foundations of Latin is used. During the third term the class studies Roman History and Viri Romæ. Correct pronunciation, thorough mastery of declensions and conjugations, and the acquisition of a vocabulary receive special emphasis during this year.

THIRD YEAR.

Greek.—The study of Greek is begun at this time. White's "First Greek Book" is used during the first two terms. During the third term the class will read the first eight chapters of Anabasis, Book I, and continue the daily study of the Grammar. During the first year in Greek the student is required to give earnest attention to the mastery of forms, elementary principles of syntax, and a working vocabulary. Accent and pronunciation are emphasized. There is a considerable amount of translation of English into Greek. Greek will not be credited in any course except the Classical.

Latin.—During the first term the class will read Nepos' Lives, during the second term two books of Cæsar, and during the third term three orations of Cicero. There will be daily study of the Grammar, and the student will be required to make critical study of the text read, especially with reference to syntax. Four hours a week during this year.

Higher Algebra.—See tabular view of the course for details. The whole of this year's work in Algebra is required of students in all courses. Ordinarily pupils who come from high schools will need to take at least the last two terms in Algebra. In most cases it would be best for them to take the work throughout the year.

History.—1. The History of England receives careful attention, especially those periods in which it has most to do with the history of our own country.

2. Ancient.—The Ancient Oriental Monarchies; Greece; Rome; the Rise of Modern Nations; Religious Movements.

3. Modern.—From the 16th century to the present. Text-book, with library investigations and class reports.

English.—One hour a week in English will be required of all members of the class in Latin of the Third Preparatory year. The work will be chosen by the professor in charge.

OUTLINE OF COURSE OF STUDY.

	FIRST YEAR. CLASSICAL, SCIENTIFIC AND LITERARY.	SECOND YEAR. CLASSICAL, SCIENTIFIC AND LITERARY.	THIRD YEAR. CLASSICAL ONLY.
Fall Term.	English Grammar, Arithmetic, Descriptive Geography.	Algebra begun, Advanced Grammar, Higher Arithmetic, Physical Geography, Latin Lessons.	Higher Algebra, Wentworth, Chap. 10-19, Nepos' Lives, Grammar (4), English (1), Greek Lessons, History of England.
Winter Term.	English Grammar, Arithmetic, Elementary Physiology.	Algebra, Elementary, cont., Elementary Rhetoric, Physical Geography, Physiology, advanced, Latin Lessons.	Higher Algebra, Wentworth, Chap. 20-27, Cæsar, Two Books; Grammar (4), English (1), Greek Lessons, continued, Ancient History.
Spring Term.	English Grammar, Arithmetic, American History begun.	Algebra, Elementary, completed, English Composition, Higher Arithmetic, American History, adv., Roman History and Viri Romæ.	Algebra, Higher, completed, Cicero, Three Orations; Grammar (4), English (1), Anabasis, Eight Chapters of Book I; Grammar, Modern History.

Figures in parenthesis indicate the number of hours a week

SUMMER TERM OF 1901.

JULY 8TH TO AUGUST 16TH.

INSTRUCTORS.

PROF. JOHN A. GRAY, A. M., PH. D.
PROF. T. H. PADEN, A. M.
MR. J. H. HARDING.
MR. W. OSCAR MOORE.
Other competent instructors will be added as may be necessary to conduct well the work called for.

OBJECTS OF THE SUMMER TERM.

To give an opportunity to begin College studies or make up deficiencies therein.

To prepare students for entrance in this College or any other.

To enable any one to do special work in collegiate studies.

To afford an opportunity for thorough review of collegiate or common branches to any who for any purpose may feel a need for such a review.

The Summer Term will be useful to all who could regularly enter this or some other College in the Fall, provided they could make up one or two studies during the Summer.

The Summer Term will also be of advantage to those who, for any reason, are irregular in their course here or elsewhere, and desire to make up their deficiencies before returning to College next year.

The summer term also affords an opportunity of doing regular College work to any who are unable to attend school during the regular College year.

For instruction in the preparatory and common branches the services have been engaged of teachers well and widely known for their ability and experience.

This part of the work will be performed thoroughly, and no one who may for any reason desire to pursue studies in this direction will be disappointed.

TUITION.

For one College Study	$4 00
For two College Studies	6 00
For three College Studies	8 00
For all Common Branches	5 00
For one College Study and Common Branches	7 00
For two College Studies and Common Branches	8 00

HINTS.

Write for information; it will cost only a two-cent stamp. Bring all the books you have on whatever subjects you wish to study. Books may be had here.

Don't bring too much money. Expenses here are very small, *e. g.:*

Room rent, per week	$ 50
Cooking, per week	50
Provisions, per week	$1 00 to 1 35

The cost of the entire term of six weeks, not including tuition, need not exceed *Fifteen Dollars.*

A Literary Society will be organized if desired.

The privileges of the College athletic field are free to students.

For information write to the president or any one of the instructors.

DEPARTMENT OF MUSIC.

PIANO, ORGAN, VIOLIN, HARMONY, THEORY.

MRS. EVA HUMMER HULL.

PIANO.

The essentials of first-class piano playing are constantly kept in view: accuracy of execution; attention to meter, rhythm, and quality of tone; phrasing; facility of execution; and intelligent interpretation.

As far as possible the work is made musical, and dry mechanical exercises are avoided.

COURSE OF STUDY FOR THE PIANO.

FIRST GRADE.

Technical Studies.
Primary Studies by Köhler, Czerny and Loeschorn.
Selected Etudes and Solos.

SECOND GRADE.

Second Book of Lebert and Stark's Piano School.
Czerny's School of Velocity.
Selected Etudes and Solos.

THIRD GRADE.

Third Book of Lebert and Stark's Piano School.
Fifty Studies by Cramer.
Selected Etudes and Solos.

FOURTH GRADE.

Clementi's Gradus ad Parnassum.
Bach's Inventions.
Chopin's Etudes.
Selected Etudes and Solos.

On the completion of the first three grades the pupil is entitled to a certificate which is valuable in getting a teaching position.

On the completion of the four grades, together with three terms in Harmony and a course of reading in Musical History, the pupil is entitled to graduation with the degree of Teacher of Music.

The length of time required to complete the course depends largely on the advancement before entering, and the diligence, talent and health afterward. Under ordinary circumstances it will require from four to five years. A very talented pupil might complete the four grades in three years.

VIOLIN.

With perhaps the exception of the Piano, the Violin is the most universally accepted and used instrument. Its capacity for eloquent and varied expression is unrivaled by any instrument in use. Although restricted in the extensive production of harmonious effects, the violin rises to the foremost position as leader in all the qualities of melody and tone, and, more than any other instrument, is the means of cultivating an ear for melody, in both player and hearers.

COURSE OF STUDY FOR THE VIOLIN.

FIRST GRADE.

David's Violin School, Part First.
Schradieck's Technical Studies.
Schradieck's Scales and Exercises.
Selected Solos.

SECOND GRADE.

David's Violin School, Part Second.
Maza's Etudes.
Selected Solos.

THIRD GRADE.

Kreutzer—Forty Etudes.
Fiorillo's Etudes.
Selected Solos.

On the completion of this course, together with three terms of Harmony and a course of reading in Musical History, the pupil is entitled to graduation with the degree of Teacher of Music.

ORGAN.

In the study of Reed Organ special attention is given to Registration and the proper use of the instrument for producing the best effects, and to the acquisition of a repertoire of works especially suited to this instrument.

The study of Church Music is made a prominent feature in the course. A course of Study has been marked out for this instrument also. The completion of it entitles to the degree of Teacher of Music.

HARMONY.

The study of harmony is universally recognized as an essential part of a musical education.

A correct understanding of the Musical Art requires some knowledge of chord formation and combination, and of melody writing.

GENERAL THEORY AND MUSICAL HISTORY.

It is the aim in the study of Theory to give a general knowledge of those principles which underlie all music. The knowledge acquired by this study is necessary to any one who wishes to become an accomplished musician, and will also enable one to listen more intelligently to good music. The subjects studied are, The Laws of Acoustics, The Orchestra and its Instruments, Thematic Development, and Musical Form.

TUITION FOR PIANO, ORGAN OR VIOLIN.

FOR FALL TERM—FOURTEEN WEEKS.

Three private lessons a week	$ 24 00
Two " " "	16 00
One " " "	10 00

FOR WINTER AND SPRING TERMS—TWELVE WEEKS EACH.

Three private lessons a week	$ 21 00
Two " " "	15 00
One " " "	9 00

FOR HARMONY, THEORY AND HISTORY.

Fall Term, two class lessons a week	$ 5 00
Fall Term, one class lesson a week	3 00
Winter or Spring Term, two class lessons a week	4 00
Winter or Spring Term, one class lesson a week	2 50

Pianos and organs may be had for practice at various rates. The ordinary charge for two hours a day (6 days in the week) for the Fall Term is $4.50 to $4.75; for Winter or Spring Term $3.75 to $4.00.

VOICE CULTURE.

MISS ANNA ALLISON JONES.

The influence of song in the cultivation of the finer sensibilities of the human mind is measureless. Singing, or music of some kind, is a part of almost every gathering.

The human voice is a wonderful creation. It is the most powerful means of expressing the emotions through music. The cultivation of the voice gives to it sweetness, strength and ease of expression. Voice Culture is also Health Cultnre. By it freshness, vigor and elasticity are imparted to the body and mind.

No one method will be taught. The best from all methods will be used to obtain perfect development of the voice. Special attention will be given to tone production and placing, correct breathing and intelligent expression.

A Rudimental Class will be formed for the study of the elements of choral music, and also an Advanced Class for the study and rendition of a high grade of musical compositions. Sometimes a student may join both these classes with benefit. The charge is very small.

TUITION.

One private voice lesson a week, Fall Term (14 weeks)	$14 00
Two private voice lessons a week, Fall Term (14 weeks)	28 00
One private voice lesson a week, Winter or Spring (12 weeks)	12 00
Two private voice lessons a week, Winter or Spring (12 weeks)	24 00

DEPARTMENT OF ELOCUTION.

MAUDE HOLLINGSWORTH BETHEL, B. S.

"What boots it, thy virtue, what profit thy parts,
While one thing thou lackest, the art of all arts?
The only credentials, passport to success;
Opens castle and parlor,—address, man, address."
—*Emerson.*

The study of Elocution trains the three great powers of the mind, the Intellect, Will and Emotion. It develops not only the mind but the body. It is useful to one, no matter what occupation is to be followed. To the speaker it is indispensable.

"There is no power like that of true oratory."

Below is given a brief outline of work for the development of voice, body and mind.

Voice Culture.—For development of Range, Flexibility, Fullness, Roundness, Depth, Resonance, and Modulation.

Physical Exercises.—Delsarte and Pantomine for development and grace of Action and strength of Endurance; Gesture movements and Facial Expression.

Development of Thought and Feeling.—Analysis of Diction and Thought, Ideas and Phrasing, Positive and Negative Ideas, Rise of Voice, Climax, Value of Words and Language.

The course extends over a period of two years, but can be shortened by extra work. This depends upon the amount of time and number of lessons per week that the pupil is willing to devote to the study.

First Year. One private lesson per week and the following class work: Physical Culture and Delsarte, Theory of Elocution, Composition and Rhetoric, Literature.

Second Year. One private lesson per week. Class lessons, Delsarte and Pantomine, Theory of Elocution, Study of Words, Shakespeare.

Upon completion a diploma will be granted.

TUITION.

FOR FALL TERM—FOURTEEN WEEKS.

Three private lessons a week	$18 00
Two private lessons a week	12 00
One private lesson a week	7 00

FOR WINTER AND SPRING TERMS—TWELVE WEEKS EACH.

Three private lessons a week	$ 15 00
Two private lessons a week	10 00
One private lesson a week	6 00

FOR CLASS LESSONS.

Fall Term—Two class lessons a week	5 00
Fall Term—One class lesson a week	3 00
Winter or Spring Term—Two class lessons a week	4 00
Winter or Spring Term—One class lesson a week	3 00

GENERAL RULES AND INFORMATION.

FOR STUDENTS OF MUSIC AND ELOCUTION.

Pupils are subject to the College Rules and also to the special rules of the department.

Both public and class recitals are frequently given. Performance at these recitals is required when assigned by the teacher. By this means that self-possession in public performance is acquired, which is so necessary to any musician.

Pupils must observe the lesson hours agreed upon.

Lessons lost by the fault of the pupil will not be made up.

Lessons lost by the misfortune of the pupil may be made up at the discretion and convenience of the teacher.

When the omission is caused by the teacher, the lesson will be made up.

Payment will be required in advance.

Teachers generally can, when requested, procure supplies for the pupils at a discount from the retail price.

Further information may be had by addressing the President or the instructors in the different departments.

ART DEPARTMENT.

Miss Sara Alison Gray, B. S.

Training the eye and hand is an important part of a finished education and should not be neglected. All need to develop a knowledge of form and color. A course in Drawing and Painting is the best way to do it. Instruction given in China Painting, Drawing and Crayon in landscapes, animals, etc. Landscapes, flowers and decorative painting in Oil and Water Colors. Special attention to beginners. Prang's System of Free Hand Drawing taught. We recommend this course to all, especially to those who are preparing to teach.

Students must have some knowledge of Drawing before attempting to work in Crayon.

Students are required to master the simpler studies before attempting anything difficult. Students will be advanced as rapidly as in the judgment of the teacher is best for them.

TERMS.

12 hours a week in Oil painting (Fall term)	$ 12 00
6 hours a week in Oil painting (Fall term)	6 00
Water Color and China painting at the same rates.	
12 hours a week in Crayon (Fall term)	10 00
6 hours a week in Crayon (Fall term)	5 00
12 hours a week in Oil painting (Winter or Spring)	10 00
6 hours a week in Oil painting (Winter or Spring)	5 00
Water Color and China same rates as Oil painting.	
12 hours a week in Crayon (Winter or Spring)	8 00
6 hours a week in Crayon (Winter or Spring)	4 00
3 lessons a week in Free Hand Drawing (Fall term)	3 00
3 lessons a week in Free Hand Drawing (Winter or Spring)	2 50

COMMERCIAL DEPARTMENT.

Miss Ica Campbell.

SHORTHAND AND TYPEWRITING COURSE.

The value of this course is that it not only aids in developing the mental powers, but also gives the student a knowledge of an art that is of practical use in the business world. The mind is trained to quickness of perception and to concentrated attention; the hand to instant responsiveness. The necessity of transcribing the phonetic notes accurately strengthens the student's reasoning power and improves his understanding and use of language.

BUSINESS COURSE.

The branches taught in this course are Bookkeeping, Office Practice, Penmanship, Commercial Law and Commercial Arithmetic. Bookkeeping and Office Practice are the leading features of the Business Course. The Bookkeeping is conducted entirely upon the actual business plan, which is vastly superior to any text-book method in existence. Students are not only better prepared in actual bookkeeping, but their knowledge of the various business forms which has been gained from actually using them is practically an addition to what would have been learned in any other way.

The time required to complete either the Business course or the Shorthand and Typewriting course depends largely on two things, namely: application and aptness.

Pupils have completed one of the courses in a very satisfactory manner in four months, while it generally requires six months.

The nature of these courses and the plan of conducting same is such that the student may enter at any time, though the majority enter at the opening of the college term.

TUITION.

Business Course, including Bookkeeping, Corporation, Commercial Law, Commercial Arithmetic, and Penmanship, entire course (an average pupil completes it in about six months)	$ 30 00
Corporation alone	10 00
Penmanship alone, per term	2 50
Shorthand and Typewriting Course, including Shorthand, Typewriting, Correspondence, Spelling, Punctation, etc., entire course (an average pupil completes it in about six months)	30 00
Typewriting alone, per term	5 00
Both courses taken together	50 00

REGISTER OF STUDENTS.
